(54) Title: A MODULAR SPRING MOUNTING FOR A SASH WINDOW COUNTERBALANCE ARRANGEMENT

(57) Abstract: A modular spring support mounting (24) for a sash window spring counterbalance arrangement (16). The modular spring support mounting (24) comprises at least a first spring support mounting element (30b) and a second spring support mounting element (30a) each for supporting a respective coil spring (22). The first spring support mounting element (30b) includes a pair of wedged shaped cross section projections (34). The second spring support mounting element (30a) includes an interengagement fitting (36) which engages the pair of wedged shaped cross section projections (34) to in use securely interconnect the first and second spring support mounting elements (30b,30a) together. Also a method of installing such a modular spring mounting (24) in which the spring mounting elements (30b,30a) are laterally slidingly engaged to securely interlock the elements (30b,30a) together.
